SETTING THE STANDARD

**ADVANCED DATA COLLECTION AND INFORMATION MANAGEMENT SOFTWARE**

TEKLYNX

EZTrak Software Modules Give You Simple, Powerful, Tools to Make Your Tracking and Data Management System Work at Peak Efficiency.

THE ADMINISTRATOR MODULE:
Allows you to create the components of your tracking system quickly and easily using terms and concepts that you define for your tracking environment.

THE VIEWER MODULE:
At the click of a mouse, quickly view and edit the items in your tracking database.

THE COMMUNICATOR MODULE:
Instantly establish communications between your tracking application database and your mobile data collection devices.

EZTRAK MOBILE DEVICE SUPPORT:
Allows you to optimize the features of your mobile devices for precise data retrieval and management.

# The Power of EZTrak Software.

The task is managing thousands of items and the data associated with them. EZTrak™ software allows you to accurately retrieve detailed information about the quantity, location, and condition of all physical items—including raw materials, finished products, tools, machinery, and documents—at any time, anywhere in the world. Decide what to track and let EZTrak software do it for you!

EZTrak software provides the industry's best balance of power and ease of use. Whether you're a two-person company seeking new efficiencies or a Fortune 500 corporation managing tens of thousands of individual items, EZTrak software does the hard part so you don't have to.

Because of its open architecture design, you can integrate EZTrak software smoothly with enterprise-wide (ERP) systems. Maximize your efficiency via easy-to-use interfaces. Outpace your competitors by integrating your logistics, tracking, and data management systems. Power, stability, ease-of-use and low cost. That's EZTrak, the easy software choice.

# EZTrak's Superior Modular Operation.

What makes EZTrak software superior is that it allows you to tailor the tracking application to your enterprise rather than the reverse. And, since EZTrak software's modules are easy to use, you can apply your experience to your application instead of to the software.

## EZTrak Software Beats Any Competing Software at Any Price.

EZTrak software can be easily configured to perform any application including: asset tracking, check-in and check-out, files and document tracking, inventory tracking, and countless hybrid applications. Best of all, EZTrak's modular tools allow application configuration without custom programming.

EZTrak software supports Microsoft® Access®, SQL™ Server, Oracle®, and Sybase® databases—flexibility that is unsurpassed by even the most costly and complex custom software.

With the industry's most popular devices supported, plus flexible and configurable scan routines, data collection is powerful and easy. Data collection can be accomplished through devices including portable bar code scanners, pen-based computers, laptop computers with an attached laser scanner or Windows™ CE™-based devices. Label printing and report writing are completely user configurable—competing products only offer a few standard options.

## Our Customer Base Speaks Volumes.

Why do industry leaders choose EZTrak software? After careful, rigorous, independent analysis of tracking software most companies decide that EZTrak is the best tracking software available.

In addition, successful companies are continuously hunting for increased profits and efficiencies. A typical EZTrak software solution replaces costly, manual, paper-based processes, and because it is designed to operate in enterprise-wide systems, EZTrak software can often replace outdated computer-based systems.

So, when you choose EZTrak software with it's proven track record, you'll be assured of the same successful results achieved by all EZTrak users.

### The TEKLYNX Global Advantage.

EZTrak software is from TEKLYNX, the world's largest automatic identification and data collection software (AIDC) publisher and the only AIDC software publisher with truly global product development, tech support, sales and marketing resources.

As an EZTrak customer, you will benefit from TEKLYNX's years of experience in the development of the world's best-selling label design software packages, CODESOFT™ and LABELVIEW™, and the world's most advanced host printing solution, SENTINEL™.

### Choose the Leader.

Select the leader in tracking software from the leading AIDC software publisher, TEKLYNX™.

# EZTRAK™

### FEATURES

32-bit Windows 95/98 or NT application

Mobile computing application framework

Supports most major DB and RDBMS systems

Supports most popular mobile devices

Scaleable—an unlimited number of users and records based on the database selected

Application and tool with no programming

Completely user definable—create virtually any tracking application

Flexible and configurable scan routines to optimize data collection

Report writing independence

Label printing independence

### MOBILE DEVICES SUPPORTED

Symbol

Videx

Intermec

Percon

Hand Held Products

Windows CE

Windows 95/NT based devices

Palm OS based devices

### DATABASES SUPPORTED

Access

Oracle

SQL

Sybase

### REPORT GENERATION TOOLS

Crystal Reports

Microsoft Access

Other ODBC-compliant report generation tools
