GENSCAN™

SETTING

THE

STANDARD

APPLICATION DEVELOPMENT SOFTWARE

GENSCAN Easy, Robust, Cost Effective Application Development Software.

GENSCAN is a 32-bit Windows 95/98/Millennium/NT/2000 application generator that provides a user-definable application framework for mobile computing.

Easy

Use GENSCAN to easily design the data collection processes for a variety of mobile devices. No programming experience is required—GENSCAN is simple to use so non-programmers can easily create custom data collection applications.

Easily understood icons facilitate quick application development. Simply click on the appropriate icon to add a new data collection step. The design window allows you to graphically view the process steps, select the properties for each one and define the links between the various steps.

Flexible

GENSCAN device support is unparalleled. Support exists for the most widely used mobile devices, with continual development of support for additional devices. This wide array of device support allows you to select the device that best fits your application and environment.

Cost Effective

GENSCAN is a low cost solution for rapid application development. The time to create custom device applications is dramatically reduced, saving valuable time and money.

FEATURES

- 32-bit Windows application
- Rapid Application Development software
- Supports the most popular mobile devices
